

Theme Hospital

A game in which you must build the hospital and operate it Theme Hospital is a Russian version of the game the aim of which is to build his own hospital. At the same time after the construction is completed you begin manage it. In the game you will depend on what the staff will carry out the work in your hospital. In addition you will have to monitor the condition of equipment in the wards. In addition, you will need to not forget that there are other hospitals and your supposed to be the best because competition in this case has not been canceled. Despite the fact that this is a game you have to remember that you have to calculate everything down to the last detail. Although any detail can be discussed when we speak of the health of patients if not present. To win in this game you have to treat it serious because only you can determine not only the prosperity of the hospital but also how many patients you treat. Theme Hospital the game develops thinking, and helps to comprehend the fact that even small decisions sometimes depends very, very much.
